EDUCATION

Columbia University <i>B.S. in Electrical Engineering</i>	New York, NY May 2027
Franklin & Marshall College <i>B.A. in Physics and Mathematics Magna Cum Laude ΦBK</i>	Lancaster, PA May 2025
University of California Berkeley <i>Visiting, Physics</i>	Berkeley, CA Summer 2023

AWARDS & HONORS

Frank Durrell Enck Memorial Prize in Physics <i>F&M</i> Established in 1975; traditionally awarded to a graduating Physics major whose overall departmental performance and involvement is most deserving of recognition.	Spring 2025
Kershner Scholar in Mathematics <i>F&M</i> Awarded to students based on their proficiency in Mathematics.	Spring 2025
Phi Beta Kappa (ΦBK) <i>U.S.A.</i> Invitation-only academic honor society recognizing excellence in the liberal arts and sciences.	Since 2025
The Nolt Music Award <i>F&M</i> Awarded to F&M student musicians to undertake musically enriching projects such as a senior recital.	Spring 2025
The Alma Mater Singer <i>F&M (238th Commencement)</i> Selected as the Alma Mater Singer for Franklin & Marshall College's 238th Commencement.	Spring 2025
Summer Scholar Award <i>F&M</i> Awarded to a student researcher for summer research conducted with faculty.	Summer 2024
Pi Mu Epsilon (Math Honor Society) <i>U.S.A.</i> Nationally recognized honorary society dedicated to furthering knowledge of mathematics.	Since Spring 2024
Sigma Pi Sigma (Physics & Astronomy Honor Society) <i>U.S.A.</i> Honors outstanding scholarship in physics and astronomy.	Since Spring 2023
Student Independent Research Grants <i>F&M</i> Awarded for advanced student research/projects whose needs exceed departmental budgets.	Fall 2023
Kershner Scholar in Physics <i>F&M</i> Awarded to students based on their proficiency in Physics.	Spring 2023
Dean's and Honors Lists <i>F&M</i> Earned Honors List recognition for achieving a 3.7 or better grade point average.	Since Fall 2021

PRESENTATIONS & CONFERENCES

- Mid-Atlantic Section of the American Physical Society Meeting** | Temple University, PA Nov. 15, 2024
• Rate equation model for fluorescence and phosphorescence in Eu^{3+} doped LaAlO_3 .
- Student Research Fair** | Franklin and Marshall College, PA Oct. 18, 2024
• Photon Counting Experiment of Persistent Luminescence in Eu:LAP
- Student Research Fair** | Franklin and Marshall College, PA Apr. 20, 2024
• Design, construction, testing, and improving: An introduction to Engineering Design Competitions.

ACADEMIC & RESEARCH EXPERIENCES

- Photon Counting Experiment of Persistent Luminescence in Eu:LAP (prep.)** May 2024 – Jan. 2025
Research Assistant Advisor: Prof. Ken Krebs F&M, Lancaster, PA
• Measured decay dynamics of excited population of impurity ions after UV laser excitation using photon counting.
• Developed a circuit solution using Arduino to precisely control excitation laser mechanical shutter, enabling photon counting of early state decay.
• Compared the emission spectra measurement with calculated energy levels of Eu^{3+} in LaAlO_3 using density functional theory.
• Conducted a literature review and originated a table summarizing experimental technique and materials.
- Society of Automotive Engineers Aero Design Competition Preparation** Sept. 2023 – May 2025
Team Leader, Pilot Advisor: Prof. Ken Krebs F&M, Lancaster, PA
• Designed a power and lift efficient, short-take-off-length 3.8 meters fixed wing plane for water delivery.
• Calculated the lift of the wing based on the structure of air foil in order to improve the load capacity.
• Fabricated the wings utilizing balsa wood and carbon fiber, employing laser cutter and heat-shrink covering film application techniques.
• Led the team members to write the design report and presented the result in a research fair.
• Wrote a funding proposal and managed to receive a year-long student research grant from the grant committee.
- Electrical and Optical Measurement of Ferroelectrics Material (PLZT)** Sept. 2022 – Dec. 2022
Researcher Advisor: Prof. Ken Krebs F&M, Lancaster, PA
• Investigated the relation between the refractive index and dielectric constants of PLZT film.
• Built multilayer models by ellipsometry data analysis software CompleteEASE to model measurements of the thickness of thin films.
• Measured the refractive index using J.A. Woollam M-2000 spectrum ellipsometry.
• Made a two-plate capacitor with PLZT as dielectric layer to obtain the dielectric constant from capacitance measurements.
• Compared optical and electrical techniques for determination of dielectric constant and refractive index.
- Universal Village Program-Smart Materials and Intelligent Electronics** Jun. 2022 – Aug. 2022
Research Assistant Advisor: Dr. Lin Zhang, Massachusetts Institute of Technology Media Lab Boston, MA
• Designed a flexible electrode pattern exposure mask using AutoCAD, in preparation for printing of mask.
• Prepared piezoelectric 1-3 composites for piezoelectric sensors.
• Organized the piezoelectric hydrogel sensors comparison table and contributed to manuscript writing, see publication (Micromachines 2023, 14, 167).

ACTIVITIES

- Vocal** Sept. 2021 – May 2025
Recital & College Chorus Singer F&M
• Sang the Alma Mater at the Class of 2025 Commencement.
• Performed with the College Chorus at major campus events (e.g., True Blue Weekend).
• Performed in end-of-semester vocal lesson recitals each semester.
- Alumni Leaders of Tomorrow, Office of Alumni Engagement** Jun. 2023 – May 2024
Member F&M
• Created alumni connection and networking programs to support student–alumni engagement.
- F&M Tennis Club** Sept. 2023 – May 2025
Member F&M
• Trained and onboarded new club members in collaboration with the coach.

SKILLS & INSTRUMENTATION

Hardware & Instrumentation: Oscilloscopes, Waveform Generators, HP LCR, M-2000 J.A. Woollam Spectrum ellipsometry, Monochrometer SR430, Stanford Research System Multichannel Photon Counter.

EDA Tools & Design Software: LT SPICE, MATLAB, Arduino IDE, AutoCAD.

Programming language: Python, Java, MATLAB, MIPS Assembly, Mathematica, Arduino, R.

Software: LT SPICE, IntelliJ, AutoCAD, MATLAB, CompleteEASE(optical modeling and ellipsometry data fitting)

Design & Analysis Skills: Analog and digital circuit simulation (AC/DC/transient analysis), Circuit design and debugging, Data analysis with Python/MATLAB/SciDavis, Characterization of electronic components and semiconductor materials

Additional Technical Skills: Laser cutting/fabrication (Glowforge), Homemade PCB including exposure and etching technics, technical documentation (LaTeX, Endnote), design visualization and project planning (X-mind), image processing (Adobe Lightroom, Photoshop)

Language: Mandarin native, Hakka native.

EXPERIENCE

Department of Electrical Engineering

Feb. 2026 – Present

Course Assistant

Columbia University, New York, NY

- Preparing the LED matrix project using Arduino for ENGI E1102: *The Art of Engineering*.

Department of Physics and Astronomy

Jan. 2024 – May 2025

Teaching and Research Assistant

Franklin & Marshall College, Lancaster, PA

- Compared two electronics textbooks and exercises to identify key instructional concepts for PHY321 Intro to Electronics.
- Tested different teaching kits selected by the professor and evaluated suitability for effective teaching and learning.

Career Center

Sept. 2022 – May 2025

Photographer

Franklin & Marshall College, Lancaster, PA

- Captured LinkedIn headshots and event photography for Career Services programming.
